INSIDE THE ALEXA-FRIENDLY WORLD OF WIKIDATA

TYLER GROSS

HUMANS PRICKED BY info-hunger pangs used to hunt and peck for scraps of trivia on the savanna of the internet. Now we sit in screen-glow-flooded caves and grunt, “Alexa!” Virtual assistants do the dirty work for us. Problem is, computers can’t really speak the language.

Alexa, Ask Wikidata! Voice interaction with knowledge graphs using Amazon Alexa

Peter Haase, Andriy Nikolov, Johannes Trame, Artem Kozlov, Daniel M. Herzig

metaphacts GmbH, Walldorf, Germany
{an, ph, jt, ak, dh}@metaphacts.com

Abstract. Voice-enabled user interfaces have become a popular means of interaction with various kinds of applications and services. In addition to more traditional interaction paradigms such as keyword search, voice interaction can be a convenient means of communication for many groups of users. Amazon Alexa

On Wire, for PA Alexa

Siri Erroneously Told People Stan Lee Was Dead

Beth Elderkin
7/03/18 2:45pm • Filed to: STAN LEE

17.4K 48 5

Stan Lee at the premiere of Spider-Man: Homecoming.
Photo: Alberto E. Rodriguez (Getty Images)

For a few brief moments, comic book fans around the world were shocked to hear some tragic news. But luckily, the panic didn’t last long. As first reported by CinemaBlend, Siri spent a little time this week telling people that Stan Lee had died on July 2. Why would a computer program falsely report a famous figure’s death? You can blame a Wiki user for that.

Sources tell us the problem can be traced back to revisions in Lee’s [Wikidata](#). If you look at the [profile’s recent history](#), Wiki user “&beer&love” changed Lee’s Wiki data to include a “date of death.” Since [Siri pulls data automatically from Wiki pages](#), without edit or modification, the program temporarily included the false death claim. The timing of the inquiry just happened to coincide with the false information being present at that point.

Mistake on WikiData found its way on Siri...

Time for the tough question...

So we know the mayor of Barcelone is a
female...

But can you list the biggest cities in the
world with female mayor ?

Try it : <https://tinyurl.com/rpg6olv>

Wikidata is an open, multilingual structured knowledge base that can be read and edited by both humans and machines.

It provides the power of searching, sorting and querying

It is a place where humans and bots can share knowledge on more equal terms.

+

WIKIDATA

The sum of all **human knowledge**

The sum of all **data and sources** backing human knowledge

Wikidata contains items...

An item may be an object, a topic, a person, a concept, a location...

Each item has a unique identifier

For example,

- Barcelona is Q1492
- Education is Q8434
- Women is Q467

Each item is language neutral

Ada (Q346047)

Ada Lovelace (Q7259)

Ada Colau (Q4779594)

Spain (Q29)

female (Q6581072)

Mayor of Barcelona (Q12155639)

Tools to improve Wikidata

Case 1 : Mix'n'match

This tool can list entries of some external databases, and allows users to match them against Wikidata items. REDLISTS on STEROIDS !

<https://tools.wmflabs.org/mix-n-match/#/>

The screenshot shows the 'Mix'n'match' tool interface. At the top, there are navigation links: 'Tools', 'Git', 'Discuss', and a logo. Below this is a breadcrumb trail: 'Catalogs | Recent Changes | Disambiguation links | Same name | Creation candidates | Search | Permalink'. The main content area displays the following information:

- Catalog ID:** 11L3
- Catalog Name:** the articles of faith, confessions
- Catalog description:**

Below the catalog information is a search input field with the placeholder text 'Qxxx or yy.wikipedia'. To the right of the input field are four buttons: 'Set Q' (blue), 'No Wikidata entry' (orange), 'N/A' (red), and 'Skip' (grey). Below the search field, the results are titled 'en.wikipedia search results' and are presented in a table with a vertical scrollbar on the right side.

| en.wikipedia search results | | |
|---|---|----------|
| George, Margrave of Brandenburg-Ansbach | certain articles of faith and confession to be drawn up by Luther; the commission was executed in the seventeen articles of Schwabach on the basis of the fifteen | Q384941 |
| Creed | " Articles of Faith " redirects here. For other uses, see Articles of Faith (disambiguation). This article is about a statement of belief. For other uses | Q183770 |
| Reformed confessions of faith | Reformed confessions of faith are the confessions of faith of various Reformed churches. These documents express consensus on doctrine for the church adopting | Q2992463 |
| 1689 Baptist Confession of Faith | The 1689 Baptist Confession of Faith , also called the Second London Baptist Confession , was written by Particular Baptists, who held to a Calvinistic Soteriology | Q965897 |
| French Confession of Faith | The French Confession of Faith (1559) or Confession de La Rochelle or Gallic Confession of Faith or La Rochelle Confession of Faith is a Reformed confession | Q1125186 |
| Book of Confessions | Creed, the Scots Confession , the Heidelberg Catechism, the Second Helvetic Confession , the Westminster Confession of Faith , the Shorter Catechism, the Larger | Q4943008 |
| Harmony of the Confessions of Faith | articles: Catechism and Reformed Christian confessions of faith Published in 1581, the Harmonia confessionum fidei (Harmony of Confessions of Faith) | Q5659221 |
| Westminster Confession of Faith | The Westminster Confession of Faith is a Reformed confession of faith . Drawn up by the 1646 Westminster Assembly as part of the Westminster Standards | Q815013 |
| Dordrecht Confession of Faith | The Dordrecht Confession of Faith is a statement of religious beliefs adopted by Dutch Mennonite leaders at a meeting in Dordrecht, the Netherlands, on | Q957109 |

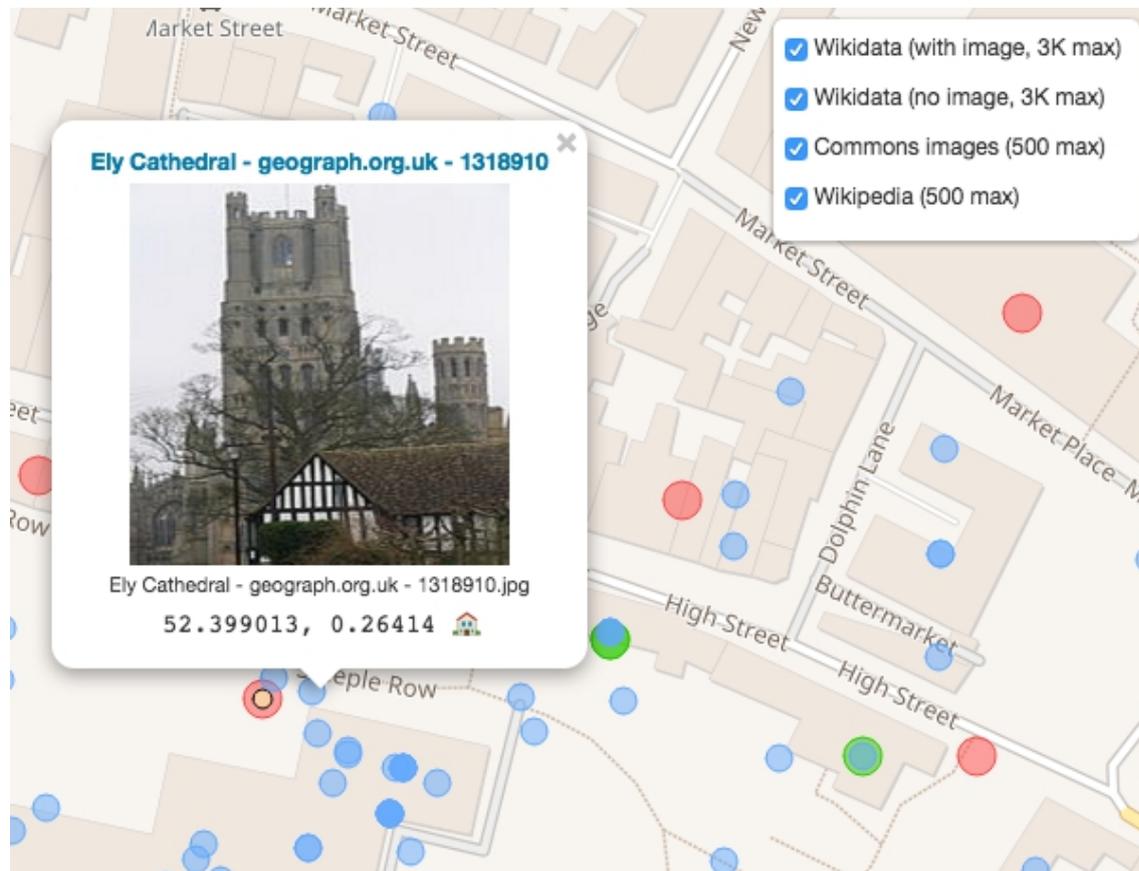

At the bottom of the page, there are links for 'Google-search Wikipedias | Wikidata | Wikisource'.

Wikidata aligns with >2500 databases and catalogues

Tools to improve Wikidata

Case 2 : WikiShootMe

This is a tool to show Wikidata items, Wikipedia articles, and Commons images with coordinates, all on the same map. It facilitates addition of images to Wikimedia projects. <https://tools.wmflabs.org/wikishootme>

Tools to improve Wikidata

Case 3 : WikiData games

A set of **games** to quickly add statements to **Wikidata**.

<https://tools.wmflabs.org/wikidata-game/distributed/>

Birthday Conflicts

Confirm/fix wikidata date of birth records.

We found the birthday information may differ between wikidata and wikipedia pages (currently only en, fr, and de wikipedia were analyzed). Click "Keep wikidata" to confirm the wikidata record. Click the green buttons to change the wikidata record to corresponding wikimedia records. If you're not sure, click "Skip". This game only changes wikidata records. It's highly recommend to correct the wrong wikimedia pages directly (with reliable reference), to make the records consistent across different wiki pages. Bug reports and feedback should be sent to [User:Chaoyuel](#).

Linked data versus Open data

"Open Data" : is accessible to anyone (e.g. without monetary cost to access, or not behind a wall) with a permissive license on reuse (e.g. public domain or CC0)

"Linked data" : data that is machine readable, semantic data, that a machine can 'understand'.

Wikidata for companies IA and Natural language

Kairntech : quand l'IA part à la conquête du langage naturel

19 février 2019 | Arrivées / départs | Tarmac, L'écho des startups du Tarmac, Tarmac incubator

Point critique dans le développement de l'IA et du machine learning : la **disponibilité de jeux de données d'entraînement**.

Fréquentes dans le monde académique, ces jeux de données n'existent pratiquement pas dans l'entreprise où 80% des données sont non structurées (texte, audio) ce qui rend inexploitable les algorithmes d'IA.

De la Vision au Langage...

L'IA a franchi un véritable cap en 2012 dans le domaine de la Vision avec de nombreuses applications industrielles à présent implémentées dans les secteurs de l'imagerie médicale, du transport... Dans le domaine du Langage, l'année 2018 a marqué un tournant pour l'IA grâce à de nombreuses avancées technologiques : la performance accrue des algorithmes et des modèles de langage pré entraînés, l'augmentation exponentielle de la puissance de calcul...

Reste un point critique dans le développement de l'IA et du machine learning : la disponibilité de jeux de données d'entraînement. En effet, toute IA a besoin d'exemples et de contre exemples pour apprendre et devenir auto-apprenante. Contrairement au monde académique, ces jeux de données dans le domaine du langage n'existent pratiquement pas dans l'entreprise où 80% des données sont non structurées (texte, audio...) ce qui rend inexploitable les algorithmes d'IA.

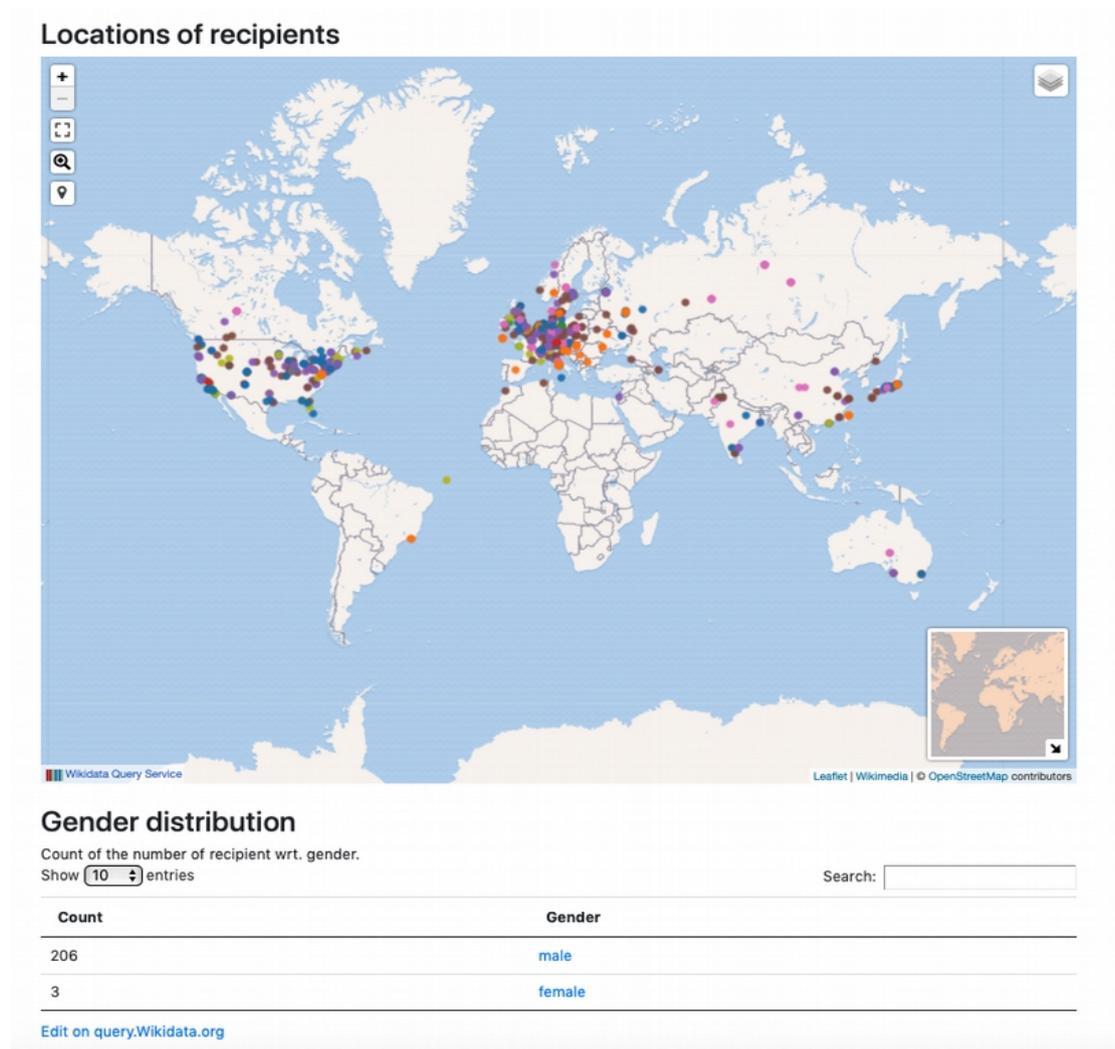

...l'importance des jeux de données pour l'IA

C'est sur cette faille qu'Olivier Terrier et Vincent Nibart, forts de plus de 20 ans d'expérience en R&D (IA, traitement du langage naturel et développement logiciel), entendent bien surfer en proposant à leurs futurs clients d'industrialiser la création de leurs jeux de données pour leur appliquer des services IA à forte valeur ajoutée.
